

EXP.NO-4	Create a web form that accepts a users name and age. Write a Servlet to process the form data and display it back on the browser.

AIM:

To create a web form to accept user input (name and age) and use a Servlet to process and display the data on the browser.

ALGORITHM:

Input:

The user enters name and age in the web form and submits it.

1.Create the Web Form:

Design an HTML form with two input fields: name and age.

Add a submit button.

Set form action to the Servlet URL and method to POST.

2.Create the Servlet:

Create a Servlet class that extends HttpServlet.

Override the doPost() method.

Retrieve input values using:

`request.getParameter("name")` and `request.getParameter("age")`.

3.Process the Data:

Store the received name and age.

Prepare a response message using the input values.

4.Send Response:

Use `PrintWriter` to display the output in the browser.

Display message like:

"Welcome [name], you are [age] years old."

5. Deploy the Application:

Run the project on Apache Tomcat server.

- Ensure proper servlet mapping using annotations.

6. Execute the Servlet:

Start the Tomcat server.

Run the project using "Run on Server".

7. Test the Application:

Open the form in browser.

Enter name and age and submit.

The processed result is displayed on the browser.

CODE:

Form.html

```
<!DOCTYPE html>

<html>

<head>

    <title>TechScope - User Details</title>

    <style>

        body {

            font-family: Arial, sans-serif;

            background-color: #0b1220;

            color: white;

            display: flex;

            justify-content: center;

            align-items: center;

            height: 100vh;

        }

        .form-card {

            background: #020617;

            padding: 30px;

            border-radius: 12px;

            width: 320px;

            box-shadow: 0 10px 30px rgba(0,0,0,0.5);

        }
```

```
h1 {  
    text-align: center;  
    color: #38bdf8;  
    margin-bottom: 20px;  
}  
  
label {  
    font-size: 14px;  
}  
  
input {  
    width: 100%;  
    padding: 10px;  
    margin: 8px 0 16px;  
    border-radius: 8px;  
    border: none;  
    outline: none;  
}  
  
input:focus {  
    box-shadow: 0 0 5px #38bdf8;  
}  
  
button {  
    width: 100%;  
    padding: 10px;  
    background-color: #38bdf8;  
    border: none;  
    border-radius: 8px;  
    font-weight: bold;  
    cursor: pointer;
```

```
}

button:hover {

    background-color: #0ea5e9;

}

</style>

</head>

<body>

<div class="form-card">

    <h1>Enter Details</h1>

    <form action="form" method="post">

        <label>Name</label>

        <input type="text" name="name" placeholder="Enter your name">

        <label>Age</label>

        <input type="text" name="age" placeholder="Enter your age">

        <button type="submit">Submit</button>

    </form>

</div>

</body>

</html>
```

formservlet.java

```
package com.techscope;

import java.io.*;

import jakarta.servlet.*;
```

```
import jakarta.servlet.http.*;

import jakarta.servlet.annotation.WebServlet;

@WebServlet("/form")

public class FormServlet extends HttpServlet {

    protected void doPost(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {

        response.setContentType("text/html");

        String name = request.getParameter("name");

        String age = request.getParameter("age");

        PrintWriter out = response.getWriter();

        out.println("<html><body style='font-family:Arial; text-align:center; background:#0b1220; color:white;'>");

        out.println("<h1>Welcome to TechScope    </h1>");

        out.println("<h2>Name: " + name + "</h2>");

        out.println("<h2>Age: " + age + "</h2>");

        out.println("</body></html>");

    }

}
```

OUTPUT:

A screenshot of a web form titled "Enter Details" in a light blue font. The form is centered on a dark blue background. It contains two input fields: "Name" with the text "Zaara Lawrence" and "Age" with the text "19". Below the input fields is a light blue "Submit" button.

A screenshot of a web page with a dark blue background. At the top, it says "Welcome to TechScope" in white, followed by a rocket emoji. Below this, it displays "Name: Zaara Lawrence" and "Age: 19" in white text.

RESULT:

Thus, the web form was successfully created and the user input (name and age) was processed using a Java Servlet. The submitted data was retrieved using `request.getParameter()` and displayed dynamically on the browser.
